PROFESSIONAL SUMMARY

B.E. Computer Science and Data Science student (graduating 2028) with a CGPA of 8.82, building hands-on experience through Python, web development, IoT and AI/ML projects. Gained hands-on experience in data cleaning, Excel and Power BI through a Skillcraft Technology data science internship. Seeking an internship to apply my skills and keep growing as a developer.

EDUCATION

B.E. Computer Science and Data Science — Expected 2028
Atria Institute of Technology, Bangalore — **CGPA: 8.82**
Class XII Seshadripuram Pre-University College, Bangalore — **87%**
Class X Millenium Eng High School, Bangalore — **95%**

TECHNICAL SKILLS

Programming: Python, C
Web Development: HTML, CSS, JavaScript
Data & Analytics: Data Science, Excel, Power BI
Tools & Platforms: Firebase, Git, GitHub
Proficiency: developing, at undergraduate level, strengthened through coursework, projects and self-driven learning.

EXPERIENCE

MES English High School - Website Development */ Live Website*

- Developed and launched a live website for MES English High School, working on its design, layout, navigation and user interface.
- Focused on creating a professional, responsive and user-friendly experience.
- Live website link: https://mesconventtvk.com/

Data Science Intern | *SkillCraft Technology*

- Built sales dashboards in Excel and created interactive dashboards using Power BI.
- Performed data cleaning and preprocessing to prepare datasets for analysis.
- Analysed data and prepared business insights from sales data.

PROJECTS

Smart Bus Crowd Management System *| IoT, ESP32/ESP8266, IR Sensors, GPS*

- Developed an IoT prototype for passenger entry and exit counting and bus crowd monitoring using ESP32/ESP8266, IR sensors and GPS.

MediWise AI | *Python, Sentence Transformers, FAISS*

- Designed an AI-based educational medication information assistant concept using Python, Sentence Transformers and FAISS; intended for information only, not medical diagnosis.

CampusBuddy AI | *Python, Flask*

- Developed an AI-based campus assistant concept using Python and Flask to provide student-related information and assistance.

Placement Training LMS | *CYPHER 4.0 Hackathon*

- Contributed to a placement training learning management system developed as part of the CYPHER 4.0 Hackathon.

Smart Water Level Monitoring System

- Worked on a smart system project focused on monitoring water levels.

COURSES & WORKSHOPS

NPTEL: Research Methodology and IPR | **Innomatics:** Data Science with GenAI
